

## Introduce New Ages Bowls to Elementary Schools.

Now you can play bowls on any flat surface, from the school gym, playground or car park to a multitude of other surfaces including grass, carpet, vinyl, wood, marble etc.

From Mount Everest to the Sahara Desert, if you can find a flat area, there is nothing to stop you from playing New Age Bowls.

These High Density Tactile Plastic Bowls perform just like any other Bowls, with a bias, forehand, backhand or even a firing shot.

You can equip a classroom of 32 kids, playing in pairs, for approximately \$1,800. This includes 8 complete sets of red and blue bowls, jacks, foot mats, carrying bags and bulls eye target games.

This means that you can now introduce young kids to the game of bowls in a manner that is safe and fun providing exercise and social interaction, and teaching teamwork and leadership.
